

DESIGN COSMOS, New Delhi

A bath space, part of the office of a real estate company, was to be designed for the directors to refresh at the office after site visits. Deep brown and gold defines class, wealth, power and sophistication and hence is used in the CMD's office and bathroom by the architects at Design Cosmos.

Italian stone (Spanish brown) is used on the floor and walls and the same stone wraps around to increase space volume and look elegant. A mix of Kohler, Grohe, Hansgrohe and Tece brands is used for sanitary and CP fittings along with an onyx stonewash basin imported from Bali. A vanity under the washbasin with CNC cut shutters, use of gold leafing in cornice and the black mirror frame in consonance with the CMD's office design are some of the key highlights of this bath space.
